Autistic Masking

Understanding Identity Management and the Role of Stigma

Amy Pearson and Kieran Rose

Masking is a form of identity management involving consciously or unconsciously suppressing aspects of identity and action. Often seen in socially marginalised groups, it is found to contribute towards poorer outcomes for autistic people and is related to higher prevalence of suicidality, exhaustion, burnout, and mental health difficulties. Though masking has been predominantly framed as a social strategy to 'blend in' with neurotypical (non-autistic) people, emerging research suggests that masking can also form as a response to stigma and from traumatic experiences. The authors consider how autistic identity may interact with other aspects of selfhood and provide a holistic understanding of the most up-to-date evidence with the aim to develop solid knowledge and practice in health and education.

Neurodiversity, Autism and Recovery from Sexual Violence

A practical resource for all those working to support victim-survivors

Dr Susy Ridout

Recovery and survival following sexual violence are unique to each individual, and this invaluable book provides a resource for those supporting autistic and neurodivergent women to take steps towards regaining control of their life.

ISBN: 978-1-913414-97-9 · Paperback · 191pp · €49.95

Enabling Capable Environments Using Practice Leadership

A Unique Framework for Supporting People with Intellectual Disabilities and Their Carers

Linda Hume, Nadia Khan and Martin Reilly

This handbook promotes a perspective shift within learning disability services that aims to move the focus of professional support away from diagnosis and identifying what someone cannot do, towards assessing and supporting strengths and providing opportunities and resources to enhance people's quality of life. Designed to be used both by facilitators and as a self-study guide for those who support people with intellectual disabilities, it will provide direction to enhance practitioners' skills and develop a more collaborative, hands-on leadership approach. The authors set out a unique framework that outlines the critical approaches that underpin enabling capable environments and how these can be implemented successfully.

ISBN: 978-1-803882-50-5 · Paperback · 220pp (estimated) · €37.50 · Spring 2024

The Neurodiversity Reader

Exploring Concepts, lived experience and implications for practice

Dr Damian Milton (lead ed)

This collection brings together work from pioneering figures within and beyond the neurodiversity movement to critically explore its associated concepts and how they might be translated into practice. In the 20 years since the inception of neurodiversity as a concept, a strong international movement championing the civil rights of those deemed 'neurodivergent' from idealised norms has grown, alongside an increasing academic interest in the concept of neurodiversity and how such ideas can relate to practice and service provision. This collection will explore the history of the movement, the concepts that have shaped it, and where the future might lead to.

ISBN: 978-1-912755-39-4 · Paperback · 350pp · €46.50

The Autistic Postgraduate Woman

Navigating the Neurotypical University

Sophie Phillips

Despite strong numbers of autistic students attending higher education, and Equality, Diversity and Inclusion (EDI) drives within academia to increase the number of disabled graduates undertaking further study, autistic postgraduate students are defined as having poorer outcomes than autistic people without degrees. This book will consider the 'unseen' challenges autistic women in postgraduate education may experience, with the aim to raise awareness and help to reduce this discrepancy. Combining a holistic view of up-to-date literature with personal experience, it will discuss some of the stereotypical and stigmatising beliefs that surround autism, consider some of the hypocrisies of being an autistic researcher of autism, and explore intersectionality and how these experiences are transferrable to other disabled and minority students.

ISBN: 978-1-803883-71-7 · Paperback · 212pp (estimated) · €37.50 · Spring/Summer 2024

Love, Attachment and Intellectual Disability

Meeting Emotional Needs and Developmental Trauma

Victoria Shimmens and Allan Skelly

The idea for this book was born from the authors' experience working together in clinical learning disabilities services, and their work to move the focus away from the management of behaviour that can challenge towards a trauma-informed, attachment-based approach to caring. The book introduces some of the key theories that have informed our understanding of the emotional development of people with intellectual disabilities and the importance of receiving love from an attachment figure from a young age. It includes case studies that focus on the lives of particular individuals, sometimes presented as individual therapy sessions and sometimes an overview of progress across many sessions.

ISBN: 978-1-803883-24-3 · Paperback · 206pp · €37.50

Intellectual Disabilities and 'Personality Disorder'

How Caring Relationships Can Support Individuals with Enduring Distress (2nd edition)

Understanding the Impact of Trauma

Identifying Care and Therapeutic Interventions

Pat Frankish

Since its publication in 2019, the FAIT – an assessment tool for determining the level of emotional development in individuals with an intellectual disability – has begun to be used more widely to inform a variety of care packages and therapeutic interventions. This book explores the concept of 'emotional disability' that can follow a traumatic event and the usefulness of applying models like the FAIT more broadly to anyone who has experienced trauma. It introduces some of the key theories that have informed our understanding of the emotional development of people with intellectual disabilities, followed by a series of case studies focusing on different individuals and how their emotional development informed their therapeutic interventions.

ISBN: 978-1-803882-87-1 · Paperback · 148pp · €34.95
